

Dr. Harrison Yoon
Chief Production and Operations Officer

Harrison Yoon joined Agrinos in 2014 as Chief Product Development Officer and has served Agrinos as Chief Production and Operations Officer since June 2015. Dr. Yoon is based at Agrinos' new state-of-the-art microbial production facility in Clackamas, Oregon. Prior to joining Agrinos, Dr. Yoon was Chief Scientific Officer and Vice President of R&D for DianaPlantSciences (DPS). He has also held several R&D leadership and executive-level positions for biotechnology companies in the U.S. and Korea.

Dr. Yoon co-founded two biotech startup companies in Korea, serving the firms as Interim CEO and CTO. For more than 20 years he has worked in the area of cell culture and fermentation, as well as bioprocess design, development and optimization in both the academic and industrial biotechnology sectors. Dr. Yoon holds a Masters of Science and a Doctor of Philosophy in Chemical Engineering from POSTECH. Following his doctoral degree work he was a National Science Foundation Postdoctoral Research Fellow at Cornell University.
